PROFILE:

Some people learn by reading. I learn by building. Every project I've worked on started with a problem I wanted to solve and ended with something deployed and functional. I've spent countless hours in hackathons, debugging sessions, and coding contests, and each one has made me sharper. Now I'm ready to bring that same drive into a team that takes what they build seriously.

SKILLS:

- Programming Languages - Python, Java (Basics)
- Frontend - HTML, CSS, JavaScript, ReactJS, Vite, Chart.js
- Backend - Django, Flask, REST APIs, JWT Authentication
- Databases - MySQL, PostgreSQL
- AI & Data Science - NumPy, Pandas, Matplotlib, OpenCV, Google Gemini API, Power BI, RAG, LLM Integration
- Core Concepts - Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA)
- Tools & Platforms - Git, GitHub, VS Code, Netlify, Vercel, Render
- Soft Skills - Collaboration, Adaptability, Quick Learner, Creative Problem Solver

EDUCATION:

B.Tech in Artificial Intelligence and Data Science 2022 - 2026
KIT - Kalaignarkarunanidhi Institute of Technology, Coimbatore, Current CGPA : 8 / 10

Higher Secondary 2019 - 2021
Government Higher Secondary School, Tiruppur , Completed with 85.33%

Secondary Education 2018 - 2019
ST.Joseph's Higher Secondary School, Pudukkottai, Completed with 79.6%

PROJECTS:

HRMS - Human Resource Management System | UK Textiles (Full Stack)

- Developed a production-grade HRMS to automate employee management, attendance, shift management, leave, payroll, salary processing, approvals, and HR operations.
- Integrated biometric attendance devices with automated punch synchronization, shift-based attendance calculation, late/early-out detection, overtime, missing punches, permissions, and leave tracking.
- Engineered payroll and salary management workflows covering salary structures, allowances, PF/ESI data, salary slips, attendance-based calculations, and Excel/PDF reporting.
- Implemented role-based dashboards and approval workflows for Super Admin, HR, HOD, MD, Directors, and employees, along with automated WhatsApp notifications for HR operations.
- Developed a dedicated Employee Web App using React, enabling employees to access attendance, leave, permission, shift, profile, notifications, and approval features through a responsive interface.
- Built a React Native mobile application for employee self-service, providing mobile access to attendance, leave, permissions, alerts, profile, approvals, and other HRMS services.

Gpay reward application: (Full Stack) GitHub -Link

- Web app enabling users to register, log in, redeem reward codes, track usage, and prevent misuse with intelligent copy-limit rules and automated suspension for suspicious activity.
- Built using Flask backend with MySQL, session-based access control, automatic data cleanup, and a responsive UI using HTML, CSS, and JavaScript.

COMPETITIVE PROGRAMMING:

- Hackathons - 4× 24-hour Hackathons (KIT), 2× 30-hour Hackathons (KIT)
- Coding Contests - Secured 29th rank out of 480 in GUVI Webkata, 40+ contests on CodeChef
- Problem Solving - 750+ problems solved on LearnLogicify, 100+ problems solved on LeetCode
- AI Platforms - Hands-on experience with 20+ AI platforms

EXPERIENCE:

AI Engineer - UK Textiles - Tiruppur - Jun 2026 (Present) - 3+ Months of Professional Experience

- Gained valuable experience as a fresher in building, deploying, maintaining, and continuously improving an entire production application, from requirement analysis and system design to development, integration, testing, deployment, and live implementation.
- Explored the practical role of AI and automation in the garment industry, identifying opportunities where intelligent systems can improve efficiency, reduce manual work, support decision-making, and enable future innovations.
- Designed and developed an end-to-end HRMS from the ground up for a textile manufacturing environment, gaining hands-on experience in transforming real-world HR and production requirements into a live, scalable software application.
- Gained strong exposure to software development in the textile/garment industry, understanding how technology can streamline workforce management, attendance, payroll, operations, and decision-making in a real-time business environment.
- Worked closely with real-time business processes, employees, HR teams, and operational requirements, translating industry-specific challenges into practical software solutions across web and mobile applications.

Data Science Internship - Profeena Infotech - Pollachi - (Jul 2024)

- Performed data cleaning, preprocessing, and exploratory analysis on real-world datasets, contributing directly to a live recommendation system built for tracking and predicting user behavior

---

TECHNICAL HIGHLIGHTS:

- Artificial Intelligence:
  - LLM Integration • RAG • Google Gemini API • AI Automation • Prompt Engineering
- Software Development:
  - Full-Stack Development • REST API Development • Authentication • Database Design • CRUD Operations
- Application Development:
  - Web Applications • Mobile Applications • Enterprise Applications • Real-Time Systems
- Deployment & Tools:
  - Git • GitHub • Railway • Vercel • Render • Cloud Deployment

---

CERTIFICATES:

- Infosys - Python Foundation, Web Development (May 2024), Artificial Intelligence Foundation
- Coursera - Foundation of Data Science, Software Engineering, Professional Data Engineer
- Altair - Machine Learning Master Certification
